

SEQURE H743 & E70 G2

FC & ESC For FPV Drones Racing Freestyle

High quality hardware

Efficient conversion

High performance chip

Innovative pads

Lightweight design

SEQURE H743

Module Name	SEQURE H743
MCU	STM32H743
Gyro	MPU6000
Barometer	BMP280
OSD Chip	AT7456E
Black Box	16MB
Firmware	SEQUREH7
Input Voltage	4-8S Lipo
BEC Output	5V/2.5A, 10V/2A
UARTS	6
Control Motors	M1-M8
LED	Support WS2812 LED Strip
Buzzer	Support
ESC Telemetry	RX8
USB	Type-C
Mounting Hole	20x20mm, Φ4mm/30.5x30.5mm, Φ4mm
Dimensions	36.5*36.5*6mm
Weight	7.5g

E70 G2 4IN1

Model	E70 G2
-------	--------

Processor	STM32G071
Firmware Version	BLHeli_32, AM32
PWM Frequency	16KHz-128KHz
Working Voltage	2-8S Lipo
Continuous Current	70A
Peak Current	150A
Support Protocol	Dshot600/300/150,Oneshot,Multishot,PWM
Telemetry Return	YES
Galvanometer	YES
BEC	NO
Mounting Hole Spacing	30.5*30.5mm, Φ4mm/M3
Product Size	45.5*42.5*6mm (L*W*h)
Product Weight	17.5g

High-performance STM32H743 MCU

Operating frequency up to 480MHz,
rapid control response

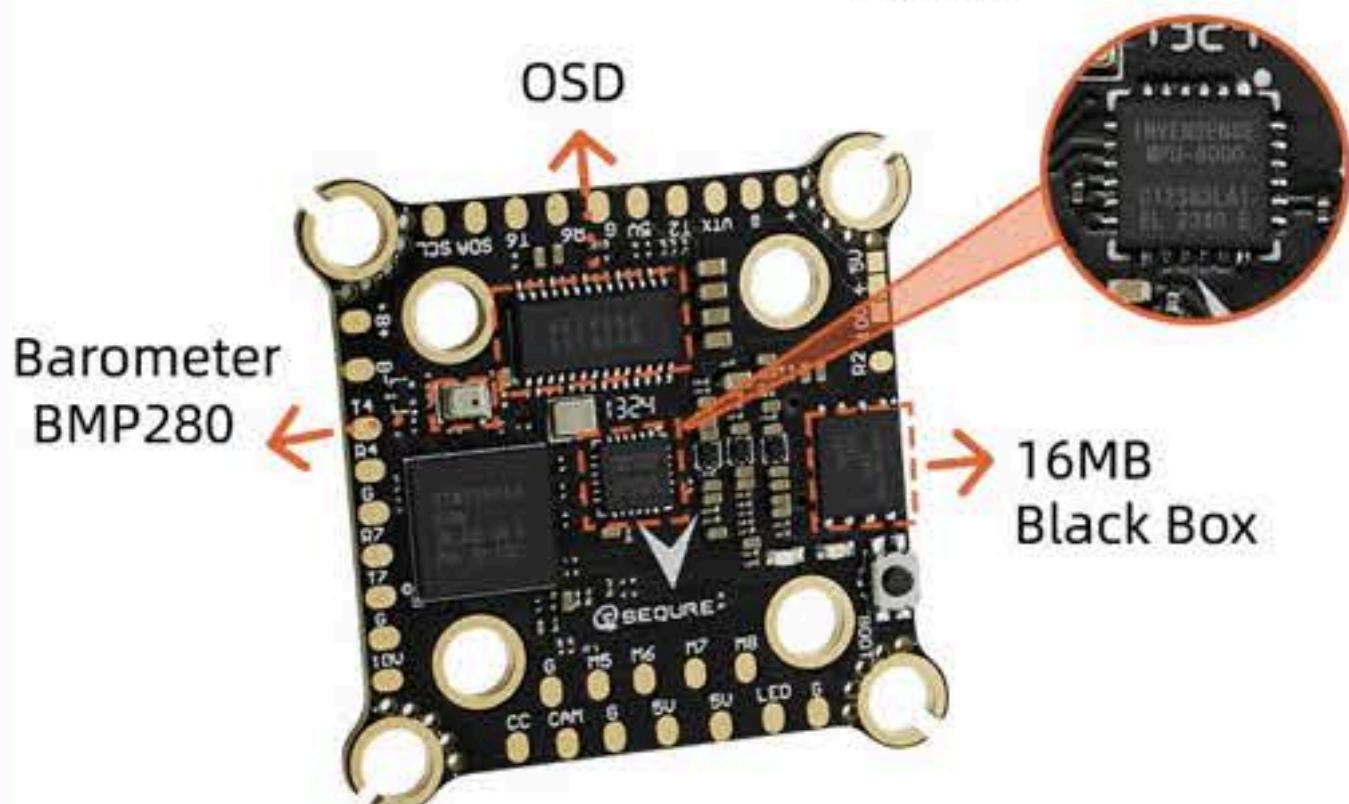

■ Onboard barometer, OSD,
16MB large-capacity black box,
effectively record flight data

MPU6000 Gyro

Achieve precise posture
sensing and stable
control

Reserve 6 UARTS to meet the needs of most devices

Port Recommended:

UART1: Receiver

UART2: VTX

UART4: Optional

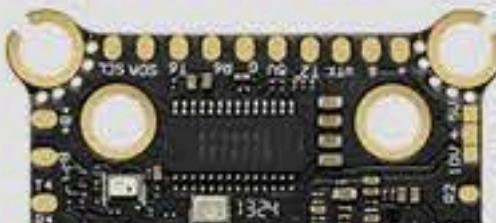

UART6: GPS

UART7: DJI HD

UART8: ESC telemetry

- Controls up to 8 motors, easily constructing X8.
- Equipped with plug-in connectors and dual BEC outputs. Provides a 10V power for DJI O3 & analog VTX.

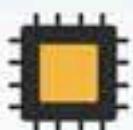

M5-M8

M1-M4

VTX

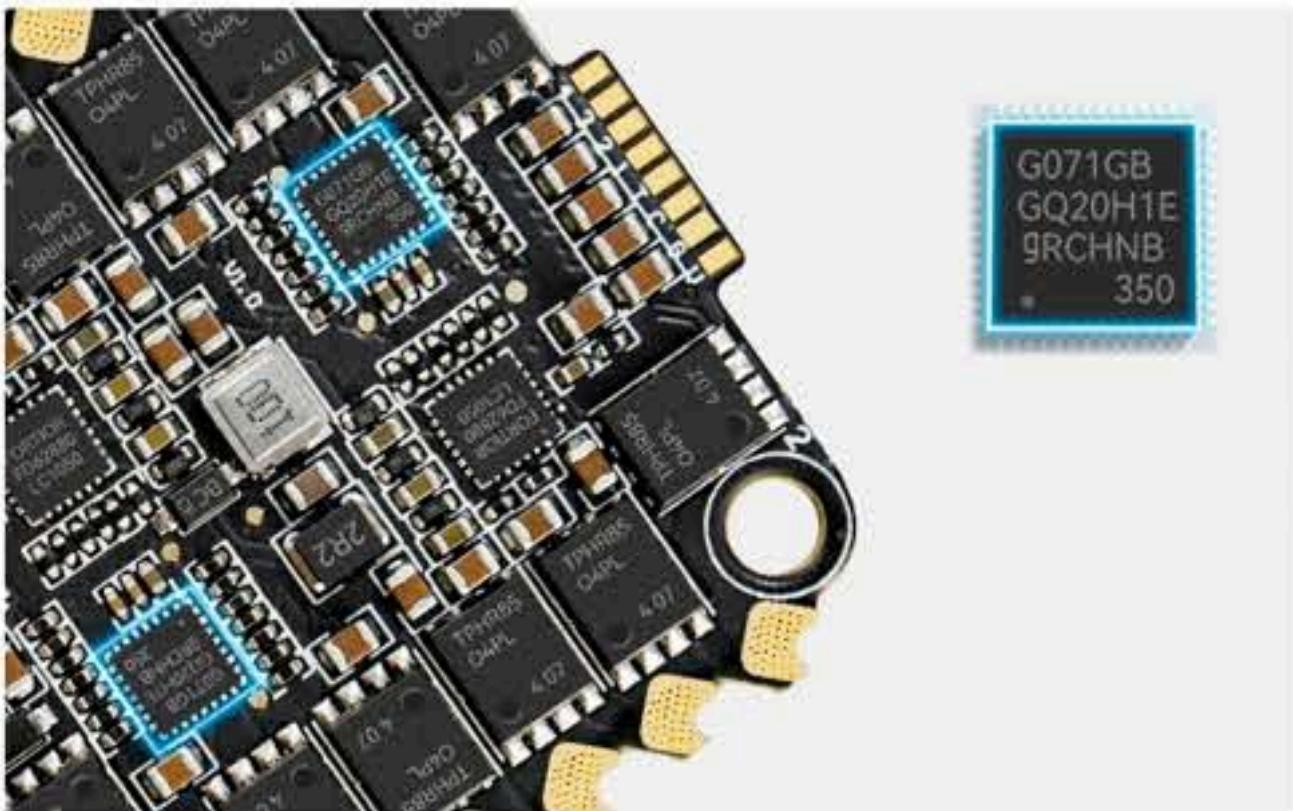

DJI O3

STM32G071 High Performance Processor

Support BLHeli_32 | AM32 firmware, 2-8S wide voltage input, single-channel continuous current 70A, peak current up to 150A

peak current up to 150A

Built-in Galvanometer

Supports telemetry return transmission to update motor speed, temperature, current and other data in real time

Speed
real-time

Current
real-time

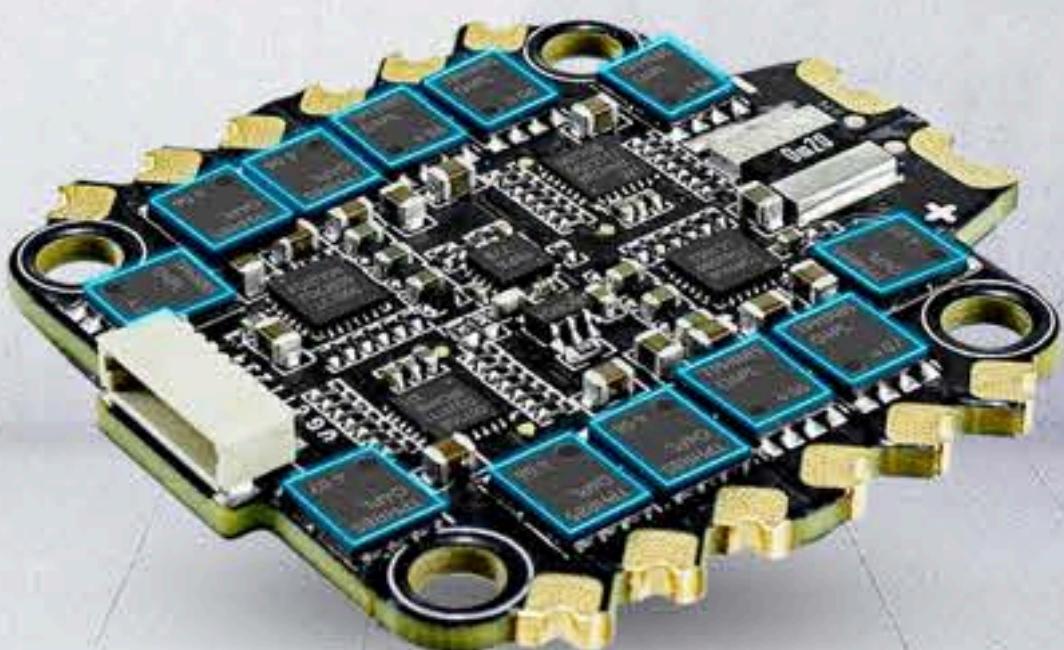

Temperature
real-time

Premium High Power MOSFET

Ultra-high efficiency conversion,
reducing losses and extending flight time

High copper thickness multi-layer PCB design increases over-current capability, efficient heat dissipation performance, and is not afraid of load pressure

Awfully
Thick PCB

Anti-Heat

PWM Frequency Supports 16KHz-128KHz

Excellent circuit design to solve the
ESC desync problem

PWM Frequency Low

16 kHz

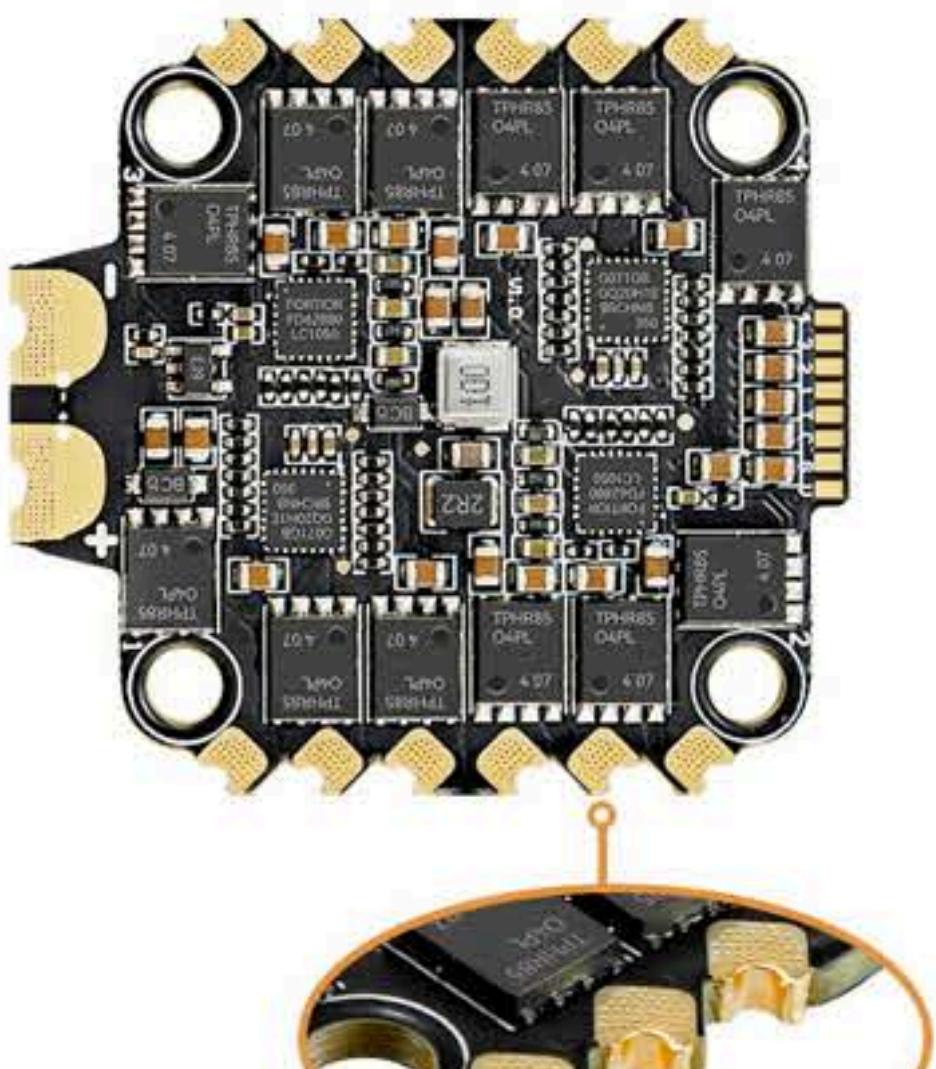

PWM Frequency High

128 kHz

Innovative Design Beveled Surface Pad

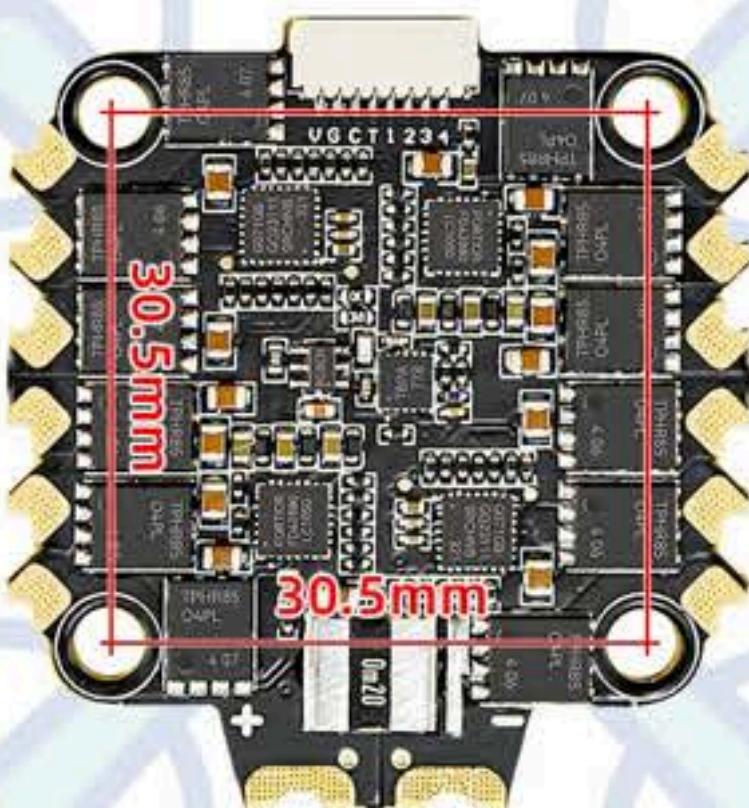

The motor wiring layout is more beautiful and safer,
while reducing the difficulty of welding

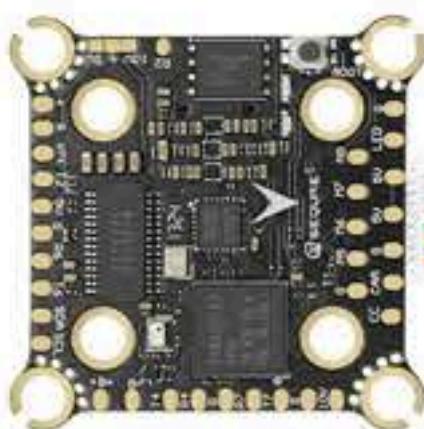

30.5*30.5mm Mounting Hole Spacing Design

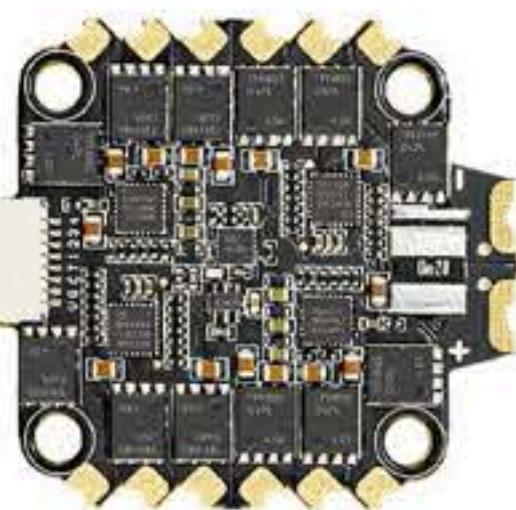

Compact structure, adaptable to
various types of racks, easy to install
